A
Bouquet
of
Wyant
Roses
for
1936

Hybrid Tea Roses

This group includes the monthly blooming varieties together with the Pernetiana types that are in general similar in both habit and bloom.

These plants usually grow $1\frac{1}{2}$ to 3 feet high and are quite bushy. They should be planted from 12 to 15 inches apart in beds so that the surface of the soil between the plants can be kept loosened, shaded and cool all Summer.

Adele Crofton—A new variety with a soft yellow color. The bushes are of moderate vigor. **85c.**

Alezane—A Rose of unusual color; extremely striking and interesting. Very vigorous upright growth. Patented. Illustrated. **\$1.50 each, 3 for \$3.75.**

Amelia Earhart—A giant Rose of exceedingly handsome form. The yellow blossoms are full double and fragrant. A fine exhibition bloom. Patented. Illustrated. **\$1.50 each, 3 for \$3.75.**

Ami Quinard—One of the darkest red Hybrid Teas. Abundant semi-double blossoms with old rose fragrance. Large, strong grower. **85c.**

Autumn—A most spectacular Rose; has some of the same shades of color as in President Hoover but they are more intense and more of the scarlet is exposed. **75c.**

Betty Uprichard—A free flowering, semi-double variety. The inside of the petals is a salmon pink, the outside is a glowing carmine with a copper sheen. Large grower. **75c.**

Alezane— (*Plant. Pat. No. 116*) A newcomer from Spain. A rose of the most astonishing colors; reddish brown on the bud, gradually evolving to apricot. The first to bloom in the Spring. One of the finest Roses ever to come from a country known for its romance and color. **\$1.50 each, 3 for \$3.75.**

Feu Pernet-Ducher. H. T.— (*Plant Pat. No. 103*) Yellow. One of the most beautiful Roses we have ever seen. Creamy buds, heavily marked with carmine, slowly open to spiral flowers of rich yellow growing lighter toward the edges, with the edges lightly flushed with pink. The autumn flowers are much darker, being a rich golden yellow shading lighter at the edges. Tall, bushy plants bloom continuously from June until frost. Delightfully fragrant. **\$1.50 each, 3 for \$3.75.**

HYBRID TEAS (Continued)

- Briarcliff**—An improved Columbia with a clean, bright shade of rose pink. Sweetly scented and disease resistant. **75c.**
- Carillon**—A free flowering bedding Rose that gives a note of cheer to the garden at all times. The full bloom is large, 4 inches in diameter. The bush is branching and a good grower. Patented. Illustrated. **\$1.50 each, 3 for \$3.75.**
- Chas. K. Douglas**—A real good red Rose. Loosely formed, fragrant flowers of a very striking crimson scarlet. **75c.**
- Charles P. Kilham**—The double large buds come out a blazing scarlet orange and open into bright orange pink. They make good cut flowers. **75c.**
- Chateau de Clos Vougeot**—One of the darkest red Hybrid Tea Roses in existence. A moderate grower of spreading habit. **75c.**
- Columbia**—The old favorite double, rose-pink blossom. Perfect buds and long, smooth stems for cutting. **75c.**
- Countess Vandal**—Patented. Perfect, long-pointed buds of bronze, copper, salmon and gold open into very large, semi-double blossoms. Illustrated. **\$1.00 each, 3 for \$2.50.**
- Crimson Glory**—The exquisite deep red blossoms that appear on a vigorous flowering bush guarantee the popularity of this Rose. The long urn-shaped buds open into well-formed deep variety crimson blossoms. A handsome free flowering Rose. Patented. **\$1.25 each, 3 for \$3.15.**
- Crimson Queen**—Deep red semi-double blossoms with long slim buds. A good vigorous compact grower. **75c.**
- Dainty Bess**—A very popular variety with single blossoms. A delicate shade of shell-pink with conspicuous purple stamens. **75c.**
- Dame Edith Helen**—Very large, very double and of perfect form. Rose pink without shadings. Delightfully scented. **75c.**
- Director Rubio**—Long cerise scarlet buds open into broad semi-double blooms of a solid deep pink. **75c.**
- Dotty**—The deep orange coloring with cerise veining and markings is found in both the bud and open blossom which is of average size. **75c.**
- Duchess of Wellington**—The suffusion of coppery yellow, blending to deep intense gold makes superb buds for cutting. A vigorous grower. **75c.**
- Edel**—An enormous, stately, well-built flower. White with faint ivory shading. **75c.**
- Edith Nellie Perkins**—Handsome, long-pointed buds open into large, double, fragrant flowers. They are a light salmon pink flushed orange. **75c.**
- Eduard Schill**—Large ovoid buds and very big double flowers. A striking color of deep coral rose. A large, very strong growing bush. **\$1.00.**
- E. G. Hill**—Gorgeous, deep red buds open into immense, very double, rich blossoms that deepen in color with age. **75c.**
- Eldorado**—Immense, very double golden yellow. Tall, vigorous growth. **75c.**
- Elizabeth of York**—Soft, cerise-pink, yellowing at the base of the petals. Semi-double; free blooming. **75c.**

Matador.— (*Plant Pat. Applied for*) Heralded as a great red Rose when shown in Europe. Blossoms are large, full, with the scarlet crimson sheen of the matador's cape. Matador brings the fire and flash of the toreador to your garden. Sturdy grower. **\$1.50 each, 3 for \$3.75.**

Countess Vandal—(*Plant Pat. No. 38*) Most popular Rose today. If limited to one variety, this would be the Rose to select. Perfect, long-pointed buds of bronze, copper, salmon and gold open into very large semi-double blossoms. Vigorous, hardy. **\$1.00 each, 3 for \$2.50.**

HYBRID TEAS (Continued)

- Etoile de Hollande**—One of the best among red Roses. A splendid grower, a reliable bloomer with rich beautiful flowers. **75c.**
- Feu Joseph Looymans**—Long pointed buds of brilliant Indian yellow open into large fragrant attractive blossoms. Moderate grower. **75c**
- Feu Pernet Ducher**—A tall bushy, free blooming Rose that bears striking blossoms. They are a rich golden color at the center, shading lighter at the edges, and often flushed with pink. Patented. Illustrated. **\$1.50 each, 3 for \$3.75.**
- Frau E. Weigand**—A large, high centered, globular, soft yellow. Vigorous grower and free bloomer **85c.**
- Gloaming**—A fine garden as well as cut flower variety. Large, full, satiny-pink blossoms heavily laden with salmon rest on long rigid stems. Delightful fragrance. Patented Illustrated. **\$1.50 each, 3 for \$3.75.**
- Golden Dawn**—Almost foolproof variety. Large, double blossoms are light yellow. The plant is low growing and bushy. **75c.**
- Grenoble**—The plant is very vigorous and the blooms come on unusually long stems. The well shaped double blossoms are a brilliant scarlet red. Deep fragrance. **85c.**
- Gruss an Teplitz**—It is the most hardy, the most vigorous and the most free blooming of all red Roses. A tall grower. **75c.**
- Gypsy Lass**—A very dark red Rose with long stiff stems. A strong grower, giving a bountiful supply of medium sized, many petaled blossoms. **85c.**
- Heinrich Eggers**—Well shaped, rose-pink blossoms are double, full, high-centered and fragrant. **75c.**
- Hinrich Gaede**—One of the most beautiful new Roses. Both shape and color superb. Brilliant coral and apricot with gold shadings. High centered and double. **\$1.50.**
- Impress**—Very large, very perfect blossoms are salmon-cerise suffused with gold. The plant, of medium height, has a strong growth. **85c.**
- Independence Day**—A very prolific bloomer. Beautiful and distinct blossoms of copper and apricot are semi-double. **75c.**
- Innocence**—One of the single Roses. The large, broad, pure white flowers are freely produced. **85c.**
- Irish Hope**—A deep red Rose; broad petaled buds opening to moderately full, fragrant flowers. Not a tall grower but has good habit. **75c.**
- Isobel**—One of the beautiful single varieties. The very large petals are an exquisite shade of soft pink and the simplicity of the flower is charming. **75c.**
- J. C. Thornton**—Long pointed buds that are good for cutting. Bright, glowing, scarlet crimson blossoms, well shaped and lasting. **75c.**
- Joanna Hill**—Soft attractive yellow flowers are of exquisite form and are borne singly on long, strong stems. **75c.**
- Jules Gaujard**—Distinct and beautiful. Large, orange-rose blossoms have a sparkling appearance different from other Roses. **75c.**
- Julien Potin**—The color is a charming shade of deep yellow. The buds are long pointed. **75c.**
- Kaiserin A. Viktoria**—The perfect form of the medium sized blossoms keeps this rose popular. Snow white with a touch of lemon. **75c.**
- Kidwai**—A charming new variety that we consider one of our best. Full shapely flowers are a pleasing shade of yellow, with beautiful highlights of cerise and cream adding to its richness. Lovely fragrance. **\$1.00.**
- Konigin Luise**—A white Rose of high merit. The large fragrant blossoms are full double and come on good cutting stems **75c.**
- Lady Alice Stanley**—One of the finest garden Roses. Large blooms with broad petals of deep rose, the inside pale flesh. Intensely fragrant. **75c.**
- Lady Ashtown**—The long pointed buds open into large, fragrant, high centered blooms with deep pink, reflexed petals. **75c.**
- Lady Forteviot**—The semi-double blossoms are borne in profusion and make a great showing. Bright yellow color, flushed with cardinal red, giving a deep apricot appearance. **75c.**
- Lady Margaret Stewart**—The color is a wonderful burnt orange, splashed with orange scarlet. Not a very strong grower. **75c.**
- Lady Ursula**—This very free bloomer is a delicate flesh pink color. The bush is of unusually vigorous, upright habit. **75c.**

Carillon
Bud

- Laurent Carle**—Produces large, intensely fragrant flowers with large buds opening into brilliant velvety carmine blooms 75c.
- Louise**—A glorious new variety that is strong and tall growing. A splendid and dazzling combination of yellow, scarlet, flame and cerise pink. Long buds and large fragrant blossoms. \$1.00.
- Lucie Marie**—A large grower freely producing double cupped salmon blossoms. 75c.
- Margaret McGredy**—Attractive unique coloring of orange-vermilion in a globular Rose of large size 75c.
- Matador**—A great Red Rose. Large, full, well-formed. The petals are a scarlet-crimson, highly perfumed with a darker sheen on the underside. Vigorous healthy plant. Patented. Illustrated. \$1.50 each, 3 for \$3.75.
- McGredy's Scarlet**—A light scarlet in the Summer but in the Fall deep scarlet with gold at the base of the petals. Flowers perfectly shaped. 75c.
- McGredy's Triumph**—A real triumph in color, size, form and plant. An exquisite shade of cerise-apricot. The plant is a vigorous grower with handsome foliage. \$2.00 each, 3 for \$5.00.
- Miss C. E. Van Rossem**—A Rose of the Bengal strain, in other words, very free blooming. Small, well shaped flowers of a good deep red color. Delicious fragrance. 75c.
- Miss Rowena Thom**—A large robust branching grower with enormous rose-pink blossoms. The color is bright, for the large petals have a yellow base. The blossoms are high-centered, well-formed, double and fragrant. 75c.
- Miss Willmott**—Large white blooms occasionally tinted with faint pink in the center are high-centered and perfectly formed. 75c.
- Mme. Albert Barbier**—Long urn-shaped buds of a deep yellow color open into full cupped soft yellow blossoms. Fragrant. 75c.
- Mme. Alexandre Dreux**—Striking bronze yellow. Fragrant blooms are high centered, of medium size and perfect shape. Moderate grower. 75c.
- Mme. Butterfly**—Beautifully shaped long buds of a rich flesh color are produced abundantly. 75c.
- Mme. Edouard Herriot**—The flower is sweetly fragrant and of striking copper color. A strong plant with glossy foliage and large thorns. 75c.
- Mme. Jules Bouche**—A high class white Rose with a dainty blush in the center. Vigorous plants. 75c.
- Mme. Nicolas Aussel**—A marvelous bright orange red with long pointed shapely buds. 75c.
- Mrs. Ambrose Ricardo**—The exceedingly large blooms are light yellow with a little pale pink intermingling. 75c.
- Mrs. A. R. Barraclough**—The long pointed buds are immense and open to huge, fragrant, soft, glowing pink blossoms, which are suffused with yellow. 75c.
- Mrs. Charles Bell**—One of the Radiance family. Its large buds are a lovely shell pink with soft salmon shadings. 75c.
- Mrs. E. P. Thom**—Canary yellow blooms are borne singly on long straight stems. One of the most dependable yellow varieties. 75c.
- Mrs. G. A. Van Rossem**—One of the outstanding multicolored Roses. The color is a striking and gorgeous combination of orange, apricot, old gold and dark bronze. 75c.
- Mrs. Henry Bowles**—One of the best pink Roses because of its fine form, lasting qualities and good color. 75c.
- Mrs. Henry Morse**—The long two-toned buds open into large, graceful pink blossoms that are freely produced, fragrant and long lasting. 75c.
- Mrs. Henry Winnett**—The deep, rich red blossoms are fine for cutting and last well; high centered, large, fragrant and double. 75c.
- Mrs. John Bell**—Great blossoms of an orange carmine, are produced singly on long, strong stems. 85c.
- Mrs. Joseph H. Welch**—One of the single Roses. Very long, pointed buds open into large, light red informal blossoms. 75c.
- Mrs. Pierre S. duPont**—A deep yellow Rose that retains its color remarkably well. The buds are long, pointed, and the fragrant blossoms high-centered and double. 75c.
- Mrs. Sam McGredy**—A wonderful combination of soft, coppery orange and apricot blends that are surely pleasing. 85c.
- Mrs. William C. Egan**—Very long, tapering buds. Deep flesh color in the center shading to shell pink. 75c.
- Olympiad**—Large, fiery, orange red blossoms shading to bright gold at the base of the broad petals. Moderate growers. 75c.
- Padre**—The coral colored, semi-double, scented flowers are profusely borne on long stems, for it is an erect, strong grower. 75c.
- Pius XI**—Well shaped creamy white blossoms. The fragrant blooms come on vigorous bushes with few thorns. 75c.

Polly—A dainty, pretty blossom on the order of Ophelia but larger. A delicate shell pink that is suffused with golden yellow at the base. 75c.

President Herbert Hoover—The most popular Rose of today. The large flowers are a striking combination of yellow, orange, cerise and scarlet. One of the strongest upright growers. 75c.

President Plumecocq—A deep copper buff Rose with a well shaped blossom. The plant is an upright vigorous grower and produces a good quantity of fragrant flowers. 75c.

Radiance—Fragrance, stems, production, disease resistance and color should place this Rose in every Rose garden. Two-toned pink. 75c.

Red Radiance—As good as Radiance. The very large, round flowers are rose red and are borne on long, strong stems. 75c.

Rev. F. Page-Roberts—One of the most beautiful Roses but a low, sprawling grower. Inside a deep golden yellow and the outside a soft red. 75c.

Roselandia—Beautifully formed high centered blossoms of light yellow. Low well shaped bushes. 75c.

Roslyn—A rich golden yellow color. Fine for cut flowers with long stems. Fragrant and long lasting. A vigorous, healthy grower. 75c.

Schwabenland—You should see the immense, deep pink, fragrant blossoms this Rose produces. A tall, vigorous grower. 75c.

Sensation—Enormous double blooms are produced on strong bushes. The fragrant blossoms are blackish red and especially splendid in the Fall. 75c.

Sentinel—A very hardy Rose with tall upright habit of growth. Large cupped blossoms of a rich velvety crimson are borne freely on long strong stems. Fine for cutting. \$1.00.

Severine—Long, slim buds open into pleasing, semi-double gold and coral flowers. A very vigorous, tall-growing bush. 85c.

Shirley Temple—A beautiful new Rose that is spritely and pretty, like its namesake. The sweet-scented blossoms are light yellow, well-formed and are produced on good cutting stems. \$2.00 each, 3 for \$5.00.

Sir Henry Segrave—Large, full, high-centered, double blossoms of exquisite form. Straw color. 85c.

Sister Therese—Large, graceful semi-double blossoms that are captivating in the bud as well as in their wide open stage. They are a deep yellow with beautiful conspicuous golden stamens. 75c.

Souvenir de Claudius Pernet—One of the most talked of yellow Roses. Its color is a definite and lovely Sunflower yellow, without any color blending. 75c.

Souv. de Georges Pernet—An oriental red, shading yellow at the base of the broad, thick petals. They are fragrant, full double, and lasting. 75c.

Souvenir de Mme. Chambard—Perfect double flowers of a novel and beautiful coloring, coral-pink with a satiny peach tint. Delicately fragrant; new but already popular. \$1.00.

Sweet Adeline—Very large, graceful, deep pink blossoms are borne on strong growing bushes. Sweet fragrance. A prolific bloomer. 75c.

Syracuse—Double bright red blossoms that are long lasting. A large, strong grower. 75c.

Talisman—One of the most popular, vividly colored Roses ever introduced. A combination of gold, apricot, yellow and deep pink. The plant grows vigorously and produces about 75 blooms a season. 75c.

The Queen Alexandra Rose—A novel Rose of striking color. Velvety carmine with ashes of Roses on the underside, shading to gold at the base. Sweetly fragrant. 75c.

Trigo—A new strong-growing attractive Rose. Flower moderately full, fragrant, deep yellow, fading to a sulphur yellow. 85c.

Una Wallace—A beautifully shaped Rose with long smooth straight stems. Fragrant, old-rose colored blooms of good size and fullness. 75c.

Vaterland—Distinct in color, a rich, deep red with maroon shadings. The bush is vigorous and strong. 75c.

Ville de Paris—A big, loose, globular Rose of a beautiful clear deep yellow color that stays yellow. 75c.

W. E. Chaplin—An exceptionally beautiful red Rose. The large, high-centered blooms are a deep crimson that do not blue nor burn. 85c.

Wilhelm Kordes—The large, double, high-centered blooms are borne on strong, stiff stems. The broad, apricot yellow petals are tinged with copper and heavily veined with vermillion. 75c.

William E. Nickerson—The deep pink color is very lasting in the fragrant, large blossoms. The plants are vigorous growers and bear their blooms singly on long, strong stems. 85c.

William F. Dreer—The colors blend from a delicate orange pink on the edges to a rich golden yellow at the base of the petals. Has exquisite color and form. 75c.

William Orr—A fine new deep crimson Rose. A strong grower producing long-stemmed large double blooms. 85c.

Wyant Cultural Suggestions

If you love Roses, you will have success with them, and if you love Roses, you will buy Wyant's strong, vigorous Roses and follow the simple directions accompanying the bushes. The following suggestions may also be of assistance to you in raising better Roses.

PLANTING

Set the bushes closely together so that the foliage will keep the ground shaded and cool; 12 to 15 inches apart for the Hybrid Teas, the taller varieties placed for the best effect. Colors in Roses seldom clash.

Select a location where tree roots cannot get into the Rose bed. Spade the soil down 15 to 18 inches, add plenty of manure, if available. If drainage is needed, the bed should be tilled and surplus water carried away.

Guard against the roots drying out from exposure to sun, wind or freezing during planting. Dig a large hole or trench, point the roots slightly downward, and have the soil loose and friable. Do not use chemical fertilizer when planting Wyant Roses, bone-meal and rotten manure are best.

PRUNING

When a Rose is set in the Spring, shorten the strong branches to 6 or 8 inches, and the weaker even more. Heap the soil as high as the branches are pruned, to protect against drying out, until the roots become established. Remove this, when the shoots come, so that the bud, or crown, is about level with the soil surface. Cultivate the soil every week, especially after rain.

For long stems and large flowers, pick your blooms with long stems. For quantities of bloom, cut short stems and nip old blossoms after the petals fall. In cutting first blossoms, leave enough stem to form the structure of a bush. Cut side branches back to 1 or 2 leaves.

For Spring planting remove dead wood from Hybrid Teas and cut strong branches down to highest big live bud. Shorten or remove weak growths.

WATERING AND FEEDING

The only fall fertilizer is bonemeal. After the ground is frozen, apply manure. In the Spring, when the bank of soil is removed, apply a complete chemical fertilizer to the established plants, but not to newly set Roses. During June or July another application of a complete chemical fertilizer can be made, this time to new as well as established Roses. Wood ashes, if available, are also a good summer fertilizer.

DISEASES AND INSECT CONTROL

A little care will remedy the few diseases and insects attacking Rose plants. Dusting is preferred to spraying.

Spray or dust aphids, small green lice about the tips of the shoots, with insecticides containing nicotine; spray or dust worms and insects which eat leaves, with a poison, such as orsenote of lead, one of the ingredients of Wyant's Massey Dust.

Knock Rose chafers, the large grayish bugs with long legs and snouts, into a pan of water covered with cool oil.

Place a drop of shellac or thick white lead on all cut ends in the Spring, to keep out the carpenter bee, which makes a hole into the exposed pith.

Prevent Black-spot, the disease which makes leaves drop off, by dusting with Wyant's Massey Dust, beginning as soon as the leaves come out and continuing every week or ten days, and more often in rainy weather. Apply a light even coat with a gun, before rains, if possible. Foliage will then be retained until frost.

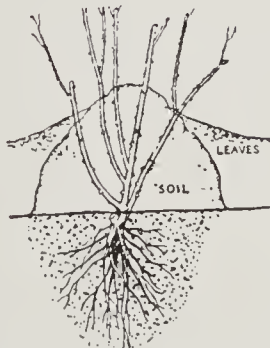

Mildew, which causes the young leaves to turn white and curl, can also be controlled by dusting with Wyant's Massey Dust.

CULTURAL REMINDERS

Complete instructions for planting
Roses are included with
each shipment.

Proper Spring pruning of older plants if branches are alive high up.

Hilled up, pruned a bit, and covered for Winter. Either old or new plants.

Showing where Rose should be pruned for Spring planting. Note depth of planting.

- 1 Begin right by buying Wyant Roses.
- 2 Plant as early as possible in the Spring.
- 3 When Roses are received don't let them dry out.
- 4 Leave Winter protection on a little longer than you think necessary.
- 5 Remove Winter protection a little at a time and then prune.
- 6 Fertilize each April and June if you want the best

results. Bonemeal is the only chemical fertilizer that may be applied to newly planted Roses.

- 7 Be systematic about controlling insects and diseases.
- 8 Disbud when side buds are very tiny if you want to produce specimen blooms.
- 9 Prune climbers only when they get too large for your trellis.
- 10 In pruning climbers remove the oldest canes after they bloom in June or July.

LIBRARY

☆ MAR 5 1936 ☆

U. S. Department of Agriculture.

Gloaming.—(*Plant Pat. No. 137*) The large, urn-shaped buds are carried on long stems, amply clothed with foliage. Ideal for cutting. Flowers of soft, satiny pink, with underlying shades of orange. Fragrant. Vigorous grower. \$1.50 each, 3 for \$3.75.

Doubloons (*Plant Pat. No. 152*)—A climber that I can highly recommend to everyone. It is covered with a mass of bloom in June and often repeats in July.

Hybrid Perpetual Roses

Hybrid Perpetuals are an older class of Roses which our parents used to enjoy so much. The bushes burst forth in a marvelous display of blooms in June, and if given good care will again bloom in the Fall. Their flowers are of very large size and are more richly fragrant than any other class.

Coronation—A large perfect exhibition Rose. A solid light pink color that is strikingly beautiful. 75c.

Druschki Rubra—Similar to Frau Karl Druschki in form but a light red color. 75c.

Frau Karl Druschki—The loveliest of all Hybrid Perpetuals. A snow-white of absolute purity; large buds are of unexcelled form. 70c.

General Jacqueminot—The old favorite "Jack" Rose. The deep rich crimson color of the fragrant double blossoms is long remembered. 70c.

Georg Arends—A delicious pink, in its most exquisite shade. Deliciously fragrant. 70c.

J. B. Clark—Very large full blossoms of an intense deep scarlet are borne several together on long, strong stems. 70c.

Mrs. John Laing—In the soft pink Hybrid Perpetuals, this variety persists among the superior Roses. One of the most constant bloomers of this class. 70c.

Mrs. R. G. Shermam-Crawford—Imbricated deep rosy pink blossoms are large, full and cupped. Vigorous growers and abundant bloomers. 70c.

Paul Neyron—Attains enormous proportions in spite of lack of painstaking care, responding with long, almost thornless stems and deep rose-colored blooms similar to American Beauty. 70c.

President Briand—Very large, fragrant, pink with salmon suffusion. Double high centered, very lasting. 70c.

S. M. Gustave V.—One of the continuous blooming Hybrid Perpetuals. Cherry red color, medium sized, well shaped bushes. 75c.

Ulrich Brunner—A cherry-red; its petals are of great substance and the blooms are lasting. Very fragrant. 70c.

SIMPLE BUT IMPORTANT PLANTING DIRECTIONS
ACCOMPANY ALL ORDERS

Carillon—(*Plant Pat. No. 136*) Destined to be one of the best loved Roses of all times. Like the Carillon it rings with happiness. It is cheerful, yet restful, with its blossoms of soft, yet brilliant, flame and coral tones. Best when planted in groups. You'll take Carillon into your heart. **\$1.50 each, 3 for \$3.75.**

Amelia Earhart—(*Plant Pat. No. 63*) Here is a truly lovely garden Rose that is both very large and very double, producing a wealth of fragrant yellow blooms. Free bloomer. Strong grower. **\$1.50 each, 3 for \$3.75.**

Climbing Roses

The Climbing Roses offered here are the best of their class. Like other styles, the styles in climbers are changing. Very few of the old ramblers are planted; the demand is almost entirely for the newer climbers which have other qualifications to commend them besides their climbing habit and abundant bloom, such as long stems which are suitable for cutting, disease-resistant foliage and large blossoms.

Allen's Fragrant Pillar—Large full fragrant satiny pink blossoms. Recurrent blooms. **\$1.25.**

American Pillar—Vigorous climber with great clusters of single, clear, rosy pink flowers, with white centers and tufts of golden yellow stamens. **75c.**

Apeles Mestres—A wonderful new Rose. Has large deep Claudius Pernet yellow blossoms that last an unusually long time. **\$1.00.**

Birdie Blye—Grows to only about 5 or 6 feet. Blooms almost continuously and bears medium sized rose-pink flowers. Also used as an everblooming shrub. **\$1.00.**

Black Boy—The blossoms are a deep velvet red. Recurrent blooms. **\$1.25.**

Blaze—An everblooming Paul's Scarlet Climber. It is very hardy and the plants we have this spring are very good and will give recurrent blooms. Patented. **\$1.25 each, 3 for \$3.15.**

Chaplin's Pink Climber—Large trusses of pure pink flowers are borne in great abundance on strong growing plants. **75c.**

Climbing American Beauty—A large flowered carmine Rose; the size and color very closely resemble the Hybrid Tea Rose, Red Radiance. Very fragrant. **75c.**

Climbing Lady Ashtown—Not reliably hardy but will come through with protection. Produces large gorgeous pink blossoms with reflexed petals in abundance during the summer, as well as in June. A strong grower. **\$1.00.**

Comet—A strong pillar-like climber. Large flesh pink blossoms are produced abundantly in June, as well as during the summer. **\$1.50.**

Countess of Stradbrook—Good double deep red blossoms that resemble those of Hybrid Teas. Recurrent blooms. **\$1.25.**

Doubloons—One of the new Horvath Hybrids; extremely hardy. A large vigorous grower with big double bronze yellow blossoms. A very prolific bloomer. Patented. Illustrated. **\$1.50 each, 3 for \$3.75.**

Dr. Huey—The darkest of all hardy climbers. The broad semi-double blossoms are a deep maroon that hold their color. **75c.**

Dr. W. Van Fleet—The most popular climbing Rose. Large soft pink flowers on long stems, waxy foliage and vigorous growth. **75c.**

Golden Climber—The large golden yellow blossoms maintain their color until they fall and are of beautiful form. In order to produce a quantity of bloom, branches should be trained horizontally. Patented. **\$1.50 each, 3 for \$3.75.**

Inermis—It is the earliest climber to come into bloom; it is the most hardy of all my climbers; it is absolutely thornless; it has a fragrant rose pink blossom and is a rank grower. **75c.**

Jacotte—Not always hardy. The large moderately fragrant flowers are coppery yellow, tinted coppery red **75c.**

Miscellaneous Roses

These Roses do not come in any of the classes before listed and in planting should not be set in beds with the Hybrid Teas. The following varieties are particularly valuable in masses, hedges, in shrub borders, or as specimen shrubs on account of their hardiness, healthiness, and their ability to thrive even under adverse conditions.

Austrian Copper—Intense copper-red with the reverse of the petals a golden yellow. Mature plants 5 to 6 ft high. 70c.

Austrian Yellow—Similar to its sister, Austrian Copper, but with its numerous 5-petaled flowers a bright yellow. 70c.

Christmas Rose—Produces white, waxy blossoms profusely outdoors from Thanksgiving until Christmas, and then off and on all winter. The Christmas Rose (*Helleborus niger*) is a low compact grower, about 6 inches high and really belongs to the rock garden or among the perennials. 75c each, 3 for \$2.00.

Dr. Eckner—New Another remontant bloomer to be added to the short list of shrub Roses. Talisman colored blossoms. 75c.

F. J. Grootendorst—Is in bloom from early Summer until late Fall, with large trusses of fringed carnation-like red flowers. 3 to 4 ft. growth. 70c.

The Green Rose (*Rose semperflorens viridiflora*)—The really green blossoms are produced abundantly and almost continuously from early Spring until freezing. Bush about two feet high. \$1.00.

Harrison's Yellow—The old fashioned yellow shrub Rose. A large easy grower and early bloomer. 70c.

Hugonis—Bright yellow flowers, which come out the earliest of any Rose in the Spring. It grows about six feet high. 70c.

Lady Penzance—A sweetbriar with fragrant foliage all through the season. A large vigorous grower covered with copper-like blooms in June. 70c.

Lord Penzance—Another one of those fragrant Sweetbriars. Has attractive fawn colored blossoms. A large thorny grower. 70c.

Moss Roses—These old favorites are noted for their delightful fragrance as well as for the attractive moss clothing of the bud. Pink 70c, Yellow \$1.00.

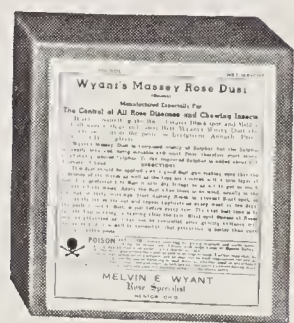

Pink Grootendorst—Just like F. J. Grootendorst except that it bears light pink blossoms. 70c.

Rubrifolia—An attractive rose all year. Purple stems, purple foliage, pink blossoms in a mass and orange red berries. 70c.

York and Lancaster—The famous old variegated Rose. Red and white striped petals. Medium sized bush. 70c.

WYANT'S MASSEY DUST

This dust for the control of all Rose diseases and chewing insects is composed mostly of sulphur, but it is many times more effective than powdered sulphur. It is fine enough to stick to dry Rose foliage and is soluble so that it will stick during rains. Wyant's Massey dust is sulphur colored, but it does not need to be applied

heavily enough to badly discolor the foliage and should be applied with a good dust gun so as to get it on the undersides of the leaves as well as the top surfaces. This dust is also often used to kill the worms on vegetables and perennials and to prevent the diseases on many other garden flowers. It is the same dust we use in the fields to dust our Rose bushes. 5 lb. carton, \$1.00 postpaid.

WYANT'S ROSE DUST

The same extra fine dust as above except it is without poison. It is to be used in the heat of the summer or in enclosed gardens where there might be danger of burning. 5 lb. carton, \$1.00 postpaid.

Pomo-Green

WITH NICOTINE

Leaf-green, all-in-one material to be used as either a dust or spray for Black-spot, Mildew, Rusts, Blight, Leaf-eating insects and Sucking Insects (Aphids) on Roses, and also on annuals, perennials and shrubs. Highest endorsement by American Rose Society. 5 lb. can, \$3.00 postpaid.

DUST GUN

An efficient, economical dust gun is one of the essential tools for Rose growing. The one which we highly recommend holds about one quart of dust, has a 24-inch extension with a curved nozzle and is so well constructed that it should last you as long as you raise Roses. It shoots the dust in a cloud so that it spreads evenly and economically on all leaf surfaces and is so easy that children love to work it. Any of our dusts may be left in the gun from one time to another without harm. \$1.25 each, postpaid.

Kitty Kininmonth—One of the delightful Australian varieties that blooms over a long period. The broad, bright pink blossoms with golden stamens are supremely lovely. Recurrent \$1.25.

Le Reve—A delightful yellow variety that serves well as either a pillar or a climber. Large semi-double blossoms 75c.

Mary Wallace—Large semi-double flowers of a bright rose pink on long stems 75c.

Max Graf—The perfect Rose for trailing purposes. Broad, shining pink single blossoms are produced abundantly in June. Heavy deep green foliage that is very persistent 75c.

Mermaid—A delightful large single yellow that blooms quite continuously. Likes to trail; needs some winter protection \$1.50.

Miss Marion Manifold—Large globular flowers of a velvety scarlet are borne several together on medium length stems \$1.00.

Mme. Gregoire Staechelin (Spanish Beauty)—The cupped blossoms are a flesh pink flushed with crimson and the petals are attractively curled 75c.

New Dawn—New everblooming Dr. Van Fleet climber. The large, soft pink flowers appear intermittently during the Spring, Summer and Fall. Patented. \$1.25, net.

Paul's Scarlet Climber—All who see its numerous, well-formed glistening scarlet flowers are immediately thrilled by it 75c.

Scorcher—The stunning fragrant flowers of gorgeous scarlet are semi-double and open to about four inches. Blooms over a long period. \$1.00.

Silver Moon—Pure white, semi-double flowers, about four inches across, with golden yellow stamens. One of the most vigorous of all climbers. 75c.

Star of Persia—A really hardy yellow climber which stays golden yellow until the blossoms fall. Single flowers are about three inches across. 75c.

Veilchenblau—The bluish flowers in large clusters on long stems are semi-double, fairly lasting and intensely fragrant \$1.00.

Zephirine Drouhin—The long-pointed rose-pink blooms are semi-double and moderately fragrant. Thornless stems, recurrent blooms. \$1.00.

Polyantha Roses

These are the Baby Ramblers or true ever-blooming Roses. They have clusters of flowers like the climbing ramblers, but are low growing, seldom exceeding 18 inches in height, and they are continually in bloom. The Polyanthas require little or no Winter protection and only pruning enough to keep them shapely or to remove dead twigs.

Cameo—A new and distinct color—shell pink and salmon with a glow of gold. A real acquisition. 75c.

Cecil Brunner (Sweetheart)—The charming little buds of seashell-pink are just right for boutonnieres 75c.

Chamois—A new type of Polyantha. The blooms are large, single and of changeable colors. 75c.

Diana—Similar in form and color to Chamois but with smaller blossoms and low compact growth. 75c.

Eblouissant—A very dazzling velvety dark red variety that does not "blue" with age. 70c.

Gloria Mundi—Glowing orange-scarlet; the most spectacular of the Polyanthas. Low, compact growth 70c.

Ideal—Small, rich garnet-red flowers are born continuously in large clusters. 70c.

Lafayette—Large flowers of striking light crimson produced in great freedom. Medium height. 70c.

Mignonette—Small white double blossoms in bloom almost continuously. Medium height with abundant foliage. 70c.

Mrs. R. M. Finch—A fine large flowered variety. Shell-pink blooms in great clusters. A large, compact grower. 75c.

Pink Lafayette—As good as the red in every way and a beautiful shade of soft rose. 75c.

Princess Juliana—Small blossoms in large clusters. The colors vary from salmon pink through flesh to white. Strong upright growth 70c.

Rouletti—The smallest Rose. Little pink blossoms about as large as a thumb nail are produced on a dainty feathery plant. Sold only in 2½ pots. 50c.

Sunshine—Orange colored, medium sized blooms in clusters. Small compact plants 75c.

Suzanne Turbat—A little gem. The plant is a small grower with dainty foliage and the delicate coral pink blooms are perfect in shape. 75c.

DELIVERY PREPAID ON ALL ORDERS EXCEPT IN 100 LOTS

THE THRILL OF GROWING THE NEW VARIETIES

A friend may describe the thrill of driving a new auto, of finding a prized antique or of seeing a marvelous sunset and yet this same friend would find the excitement, the joy and the beauty of growing the New Rose creations just as great.

There is a thrill of pleasant anticipation as you make your selection and then carefully plant according to the directions which accompany the Roses. Soon, after only a few weeks of care, comes the pleasure and exquisite beauty of the new blooms. They may be brilliant flame tints of Carillon, or the deep apricot shades of Alezane, or again they may be the already famous and superb Countess Vandal or the fire and flash of the new Matador. Or some of the other delicate shadings of coral, apricot and flame may give you the thrill which older varieties cannot produce.

RED RADIANCE
WYANT ROSES - MENTOR, O.

PERMANENT WATERPROOF TAGS ATTACHED TO ALL WYANT ROSES

Every Wyant Rose can be identified for years to come from the weatherproof embossed aluminum name tag attached to it before shipping. This permanent labelling is done for you without additional charge and helps to keep your Rose Garden well classified.

ROSES ARE EASY TO GROW

There are very few "Do's" and "Don't's" in connection with successful Rose growing. One of the main things is to start out with good Roses. Cheap ones may give you results but if good ones are planted the results are so far superior in growth and bloom that the difference in price is well worth while. Thousands of Rose lovers all over the country have found that Wyant Roses produce satisfaction.

Roses are not particular about their location or type of soil in which they are set but it pays to keep them away from the interference of tree roots and the better the soil, that is, the more humus or food it has in it, the better they will grow and bloom.

Simple planting directions accompany all orders and if they are followed and the planting is done early in the season with Wyant Roses perfect results are sure to follow.

WYANT ROSES ARE QUALITY ROSES

Wyant Roses are of the highest quality and are all two-year field grown budded bushes. Having been raised in the severe climate of Northern Ohio by a Rose specialist, they will produce satisfaction in your garden if given a chance.
